This is in reference to your submission and accompanying letter to the Firearms Technology Branch (FTB), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), asking for an evaluation of a replacement shoulder stock for an AR-15 type rifle. Your letter advises that the stock (referenced in this reply as a "bump-stock") is intended to assist persons whose hands have limited mobility to "bump-fire" an AR-15 type rifle. Your submission includes the following: a block to replace the pistol grip while providing retention for the selector stop spring; a hollow shoulder stock intended to be installed over the rear of an AR-15 fitting with a sliding-stock type buffer-tube assembly; and a set of assembly instructions.

The FTB evaluation confirmed that the submitted stock (see enclosed photos) does attach to the rear of an AR-15 type rifle which has been fitted with a sliding shoulder-stock type buffer-tube assembly. The stock has no automatically functioning mechanical parts or springs and performs no automatic mechanical function when installed. In order to use the installed device, the shooter must apply constant forward pressure with the non-shooting hand and constant rearward pressure with the shooting hand. Accordingly, we find that the "bump-stock" is a firearm part and is not regulated as a firearm under Gun Control Act or the National Firearms Act.

Per your telephoned instructions, we will contact you separately to make return delivery arrangements.

We thank you for your inquiry and trust that the foregoing has been responsive.

Sincerely yours,

John R. Spencer
Chief, Firearms Technology Branch
